-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Paper No(s)/Mail Date. \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_.

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Figures 3-4 illustrate a first embodiment wherein a fixing device is configured to have a pressure nip formed by two rollers and a belt in which the inlet roller has a greater pressure than the outlet roller.

Species II: Figures 5-6 illustrate a second embodiment wherein a fixing device is configured to have a pressure nip formed by a pressure pad and a belt in which the inlet of the pad has a greater pressure than the outlet of the pad.

Species III: Figure 7 illustrates a third embodiment wherein a fixing device is configured to have a pressure nip formed by a plurality of rollers in which the inlet roller has a greater pressure than the outlet roller.

Species IV: Figure 8 illustrates a fourth embodiment wherein a fixing device is configured to transfer and fix a toner image, having a pressure nip formed by two rollers and a belt in which the inlet roller has a greater pressure than the outlet roller.

Species V: Figures 9-10 illustrate a sixth embodiment wherein a fixing device is configured to have a pressure nip formed by two rollers and a belt in which the outlet roller has a greater pressure than the inlet roller.

Species VI: Figures 11-12 illustrate a seventh embodiment wherein a fixing device is configured to have a pressure nip formed by a pressure pad and a belt in which the outlet of the pad has a greater pressure than the inlet of the pad.

Species VII: Figure 7 illustrates also an eighth embodiment wherein a fixing device is configured to have a pressure nip formed by a plurality of rollers in which the outlet roller has a greater pressure than the inlet roller.

Species VIII: Figure 13 illustrates a ninth embodiment wherein a fixing device is configured to transfer and fix a toner image, having a pressure nip formed by two rollers and a belt in which the outlet roller has a greater pressure than the inlet roller.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Kelly Hyndman (39234) on 3 January 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
